HOW TO USE THIS BOOK

How much do you know about the world? Are you confident about continents and in the know about oceans, or does your world knowledge need a little polishing? There's only one way to find out, so get ready to embark on the Round-the-World Quiz!

The questions in this book are split into three different levels: Newbie, Rookie and Genius. Each one is a bit trickier than the last, and each one is worth a point. Start at Newbie level and see how you do, then challenge yourself to answer the harder questions. Don't leave the rest of the family out, either – why not ask Mum and Dad to tackle some Genius-level questions and see how much they really know?

Every question is worth one point. For questions where you have to match things up, such as the Newbie question on page 10, you have a chance to earn some bonus points, as each item correctly matched is also worth a point.

Remember: you don't have to answer every question on each page, so don't worry if you get stuck.

At the back of the book you'll find a map of the world. Your mission is to score enough points to colour it all in.

Each area of the map is labelled with a number. Once you score that number of points, you can colour the area in. The more questions you answer, the faster you will colour your map!

So, get your colouring pens ready, get your brain in gear and set off on the Round-the-World Quiz...
