## **DISTANCES MAY BE GREAT UP HERE IN THE NORTHERN STATE OF QUEENSLAND,**

but the attractions are suitably big as well. For a start, the Great Barrier Reef is a constant presence along this splendid coast, surrounding idyllic archipelagos such as the Whitsundays, and is ideal for exploration, especially from Cairns to the Cape. Then there's the Daintree, a World Heritage-listed expanse of rainforest that carpets the interior and shadows pristine white-sand beaches. There are the crocs that lurk in northern rivers. And the rock art and remote roadhouses that inhabit the interior. And yet, when all's said and done, Queensland knows how to have a good time, and the southeastern coast has perfected the art of doing just that – and making sure the whole world knows about it.
