Why Go?

Few parts of the world get named after yachts, which helps explain why in Granma (christened for the boat that delivered Fidel Castro and his bedraggled revolutionaries ashore to kick-start a guerrilla war in 1956) Cuba's *viva la Revolución* spirit burns most fiercely. This is the land where José Martí died and where Granma native Carlos Manuel de Céspedes freed his slaves and formally declared Cuban independence for the first time in 1868.

The alluringly isolated countryside helped the revolutionary cause. Road-scarce Granma is one of Cuba's remotest regions, with lofty tropical mountains dense enough to harbor fugitive Fidel Castro for more than two years in the 1950s.

Its isolation has bred a special brand of Cuban identity. Granma's settlements are esoteric places enlivened with weekly street parties (with outdoor barbecues and archaic hand-operated street organs), and provincial capital Bayamo is among the most tranquil and cleanest places in the archipelago.

When to Go

- ➔ Pockets of Granma already have a balmy climate, but from January to February the beach area of Marea del Portillo becomes the warmest place in Cuba.
- ➔ To see provincial traditions at their finest, don't miss Bayamo's biggest celebration, the Incendio de Bayamo on January 12.
- ➔ In the far wetter Sierra Maestra mountains, March and April are the driest times for hiking the trails, with bearable nighttime temperatures.
- ➔ December 2 is the anniversary of the historic Granma landing, which put the Revolution in motion; it's celebrated with festivities and a ceremony at Las Coloradas.
