Nicaragua Today

Like him or loathe him, President Daniel Ortega's re-election has delivered something that Nicaragua has lacked for a long time: a sense of stability. Gone are the transport strikes, debilitating power rationing and unpredictable rallies. And, after being devastated by the civil war, the country's economy and infrastructure are slowly being reconstructed. But all is not rosy, Nicaragua remains the poorest nation on the American continent and questions continue to be raised at home and abroad over perceived erosion of democracy.

Election Controversy

Prior to reclaiming the top job, President Daniel Ortega had appeared on the ballot paper in every one of the previous four Nicaraguan elections, so it was not a huge surprise when, as his return term was nearing its end, reports surfaced that the FSLN leader was not too hot on the idea of handing over the reigns to a successor.

Confirmation that Ortega was not yet ready to relinquish power surfaced in 2009 when the Frente Sandinista de Liberación Nacional (Sandinista National Liberation Front; FSLN)-dominated Supreme Court overturned a constitutional ban on consecutive presidential terms. The opposition launched legal challenges in an attempt to overturn the ruling without success.

Despite the controversy, the lead-up to the November 2011 election was somewhat subdued. Ortega's return to the presidency had not turned out to be the disaster that many on the right had predicted. During his five years in office, the economy had performed strongly with exports doubling and foreign direct investment increasing fivefold.

Polls leading up to the election showed Ortega well in front, confirming the suspicion that many in the once-rabidly anti-FSLN private sector had gotten over its distrust of the former rebel.

In the end, Ortega cruised to victory with 62.7% of the vote, more than twice that of his closest rival, conservative radio personality Fabio Gadea, who claimed fraud. Observers from the Organization of American States reported significant irregularities, but not sufficient to change the outcome.

Ortega's democratic credentials were further challenged in local elections in 2012, in which the FSLN won 127 of the 153 municipalities. Monitoring organization, Ética y Transparencia (Ethics and Transparency), identified irregularities in 70 municipalities it surveyed.
