Why Go?

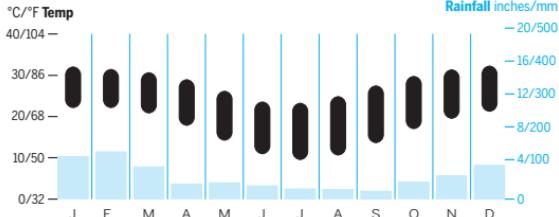

The stunning powdery white beaches and aqua-blue waters of the tropical islands and coral cays of the Capricorn Coast superbly fit the picture-postcard image. The peaceful islands of the southern Great Barrier Reef – Heron and Lady Elliot in particular – offer some of the best snorkelling and diving in Queensland, while remote beaches and windswept national parks can be found along the entire Capricorn coastline.

Inland from the coast is cattle and coal country, with steakhouses aplenty and vast coal deposits that fuel the region's booming economy. In amongst it all are gemfields filled with precious zircons, amethysts, rubies and sapphires.

Rising above the inland plains, the weathered plateaus of the Great Dividing Range form spectacular sandstone escarpments, especially around the Carnarvon and Blackdown Tableland National Parks, where ancient Aboriginal rock art, deep gorges and waterfalls abound.

When to Go

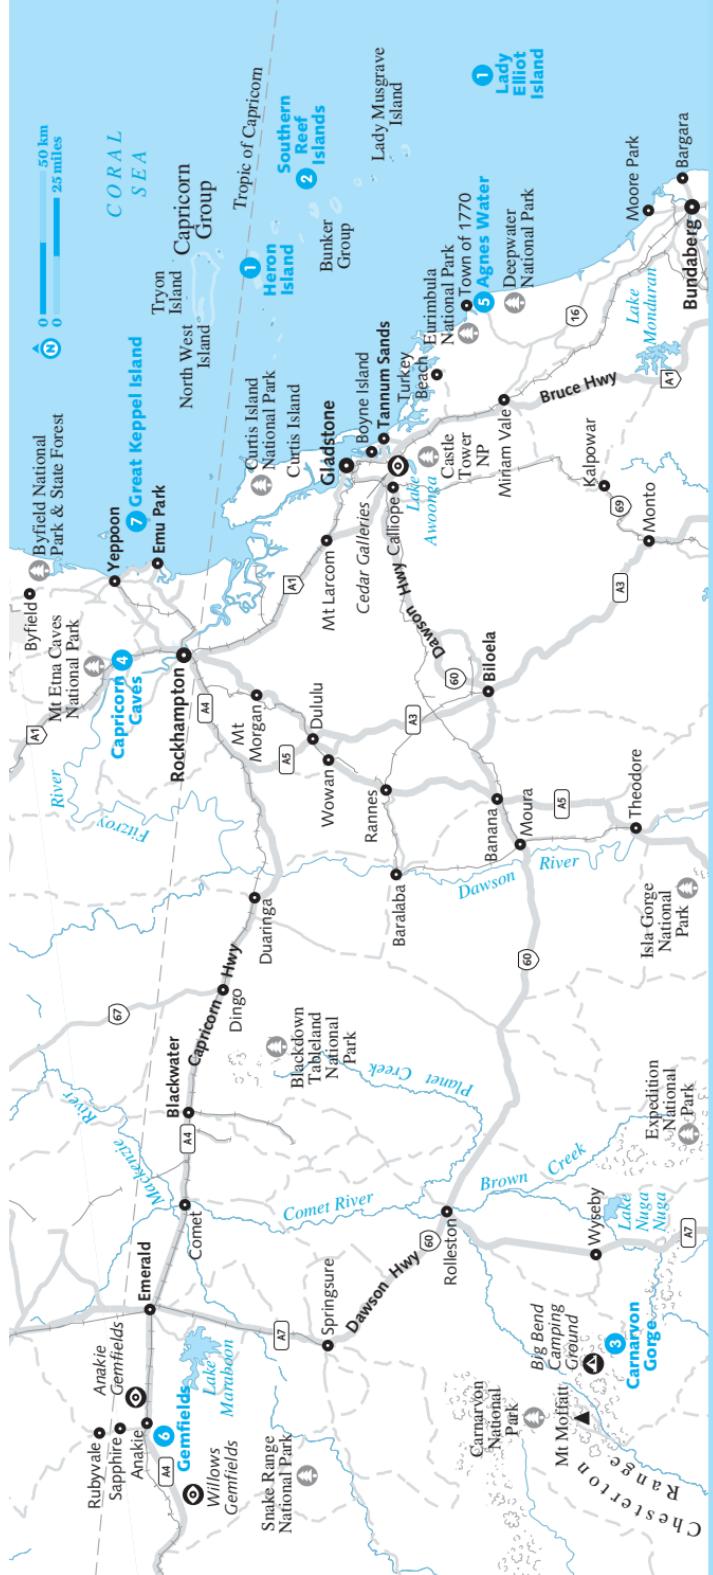

Rockhampton

March–May
Carnarvon Gorge is full after the wet season and wildlife abounds.

September–November
The waters are warming and the weather is still relatively mild.

December–February
Temperatures soar and stingers are the scourge of beach swimmers.
