## Why Go?

For travellers, this section of the journey across European Russia will often be accompanied by the excitement of departure from the capital. It is a relatively densely populated section that has three main routes. One veers northeast via Yaroslavl and a second (used by Yekaterinburg's flagship *Ural* train 16) goes southeast via multicultural Kazan. The most common route, however, passes through the ancient town of Vladimir and at Nizhny Novgorod crosses the Volga – a geographic highlight of this leg – before continuing to Perm, a city that is reinventing itself as a modern cultural capital. Kungur, set in rolling hills, has a spectacular ice cave, and finally the train rattles sublimely across the Europe–Asia border and into Yekaterinburg.

## When to Go

### Nizhny Novgorod

**Feb** Much of the Volga River will be frozen over and draped in a winter landscape.

**late Apr–late May** A spring sun warms the air and life moves onto the streets.

**late Jul–Sep** The navigation season is in full swing on the Volga and hiking is excellent in the Urals.
