## Why Go?

Turkey's sparkling Aegean coast boasts 4000 years of civilisation – and it's got the ruins to prove it, the most famous being the capital of Roman Asia Minor itself: Ephesus. Nearby, the ancient ports of Priene and Miletus, and the temple at Didyma, give the complete picture of the Aegean in centuries past.

In summer, the coast's population swells as millions of tourists descend on Marmaris, Kuşadası and, especially, Bodrum, Turkey's most glamorous seaside getaway. This whitewashed town beneath a 15th-century castle somehow maintains an air of refinement through the non-stop partying, while boutique hotels and elegant eateries keep springing up, both here and in the sophisticated coastal villages of the Bodrum Peninsula. On the remote Datça and Bozburun Peninsulas, more elemental pleasures await in the rugged terrain and fishing villages with spectacular Aegean views.

The coast is most peaceful in spring or fall (when prices drop, too).
